Price, UT 84501

Dear Neil:

Here is a sketch of the work we intend to do during "Phase One" of the development of the Dry Wash project. This sketch covers the same area as the other sketches previously submitted, concerning our Notice of Intent filed on the Reefer #3 claim, BLM serial number UMC335904.

We propose to begin development on both ends, as indicated, while remaining clear of the "cultural site area". This will include:

- 1- Widening the existing road on the west end of the location to the point we will eventually turn east from.
- 2- Construction of access roads, facing up three portals, and stockpiling of topsoil. All of the work in this area during phase one is to be done east of the fence, as shown on the sketch.

In addition, when facing is complete, we will begin development of the portals.

Will you please include a stamped copy of this sketch with your response?

Thank you,

Ron Wright

COUNTRY ROAD

PHASE ONE CONSTRUCTION:

1- widening of existing road on west side.

2- Construction of access roads, facing up for portals, stock piling topsoil, etc.

All work except widening existing road on the west side will be done east of the fence.
